

Data Engineering Track — Placement Guidelines for Students

Centre of Excellence · Career Signature Tracks · Effective 30 September 2026

Why your placement path is different

You have completed a specialised Data Engineering programme. You will be placed as a specialist, not a generalist.

- Specialised opportunities matching the Data Engineering skill set are opened for CoE students
- You will not be part of unmatched skill-set companies open on the **Student App**
- Every opportunity you are presented to meets a defined salary floor
- The Centre of Excellence prepares you for each drive you are shortlisted for

The trade

- **You give up:** unmatched, high-volume opportunities
- **You get:** better packages, shortlisting on your assessed ability, and focused preparation for every opportunity

A few well-matched, well-prepared drives convert better than many unmatched ones.

The companies you will be presented to

Every opportunity you are put forward for meets a minimum standard, checked by the CoE before any profile is shared.

Salary floor

₹6.00 LPA

B.Tech / B.E. / MCA — minimum fixed

₹5.00 LPA

BCA — minimum fixed

- **Fixed** means guaranteed annual cash — not variable pay, bonuses or stock
- Nothing below this floor will reach you through this track

Roles you will be considered for

- Data Engineer
- Data Analyst / Analytics Engineer
- AI Engineer
- Python Developer / backend engineer on a Python stack
- Forward Deployment Engineer
- Pre-sales, technical sales and other client-facing roles in software and data — solutions engineering, implementation, technical consulting

These roles match what your track trained you on: Python, SQL, ETL/ELT, warehousing, PySpark, Databricks, Snowflake, cloud and Git.

Upgrading your first offer

- Once you hold an offer, you can be considered for another opportunity only if it is **1.5× or more of your current total CTC**
- Upgrades are possible **only before you join**. Once you join a company, no further opportunities are open to you
- Anything below 1.5× is not an upgrade, and you will not be shortlisted for it

How opportunities reach you

- Specialised opportunities for the DE track are opened on the **Student App**
- You apply there, the same way as any other opportunity
- Shortlisting is then done by the **CoE Solutioning Lead** on assessed skill match — not on who applied first
- If you think an opening on the app matches your profile and the salary floor, raise it with the CoE Ops Mentor

How you get considered for an opportunity

You apply on the Student App. The shortlist is built for you, on what you have demonstrated.

What the shortlist is built on

- Your cohortisation and module assessment scores
- Your project work — completion, depth and quality
- Your mock interview performance
- Your attendance and participation in the track
- **Not shortlisted?** Another profile matched that JD more closely. The Solutioning Lead will tell you the specific gap — ask if it is not offered.
- **Your assessment scores and project quality are your application.** Treat every module assessment as part of your placement file.

What the Centre of Excellence commits to you

For every drive you are shortlisted for, before the company's first round:

- **The actual JD**, shared with you — role, stack, location, package structure and the full interview process
- **Targeted preparation** on the specific technologies and round format that company uses, not generic revision
- **An internal mock test and mock interview** before you face the company
- **Resume and project positioning** aligned to that JD
- **A named mentor** you can reach through the process
- **Honest feedback** after every round, whether you convert or not

You will not be sent into an interview cold. If you feel unprepared for a scheduled round, tell the Solutioning Lead **before** the round.

What is expected from you

The CoE has told hiring partners that the students we send are prepared, punctual and serious. That holds only if you make it hold.

Non-negotiables

1. **Attend every round you are shortlisted for.** Once your profile is shared, you are committed.
2. **Join on time.** Log in 10 minutes before any scheduled call, assessment or interview.
3. **Attend every mandatory mock.** Mocks are part of the drive, not optional practice.
4. **Respond within 24 hours** to your mentor or a recruiter.
5. **Keep your resume and project links current** and exactly as approved by the CoE.
6. **Tell your mentor immediately** if something will stop you attending — before the round, not after.

Maintain at least 70% attendance in the training. Below 70%, you are excluded from the Centre of Excellence and from all CoE opportunities. Attendance is checked before every shortlist.

Also expected

- A working setup: stable internet, working camera and microphone, a quiet space and a backup plan
- Professional conduct on calls with recruiters — you represent the whole cohort
- Honest self-reporting on what you do and do not know; a mentor cannot close a gap you hide
- No sharing of assessment content, and no external help during an assessment. This ends your participation in the track, immediately.

If you miss a scheduled round

The rule: one unexcused absence, and you are withdrawn from the next two opportunities.

- **Second unexcused absence:** blocked from the next **four opportunities**, plus a review with the CoE Head
- **Third unexcused absence:** permanent removal from the CoE pool for the rest of the cycle

What counts as an absence

Situation	Counts?
Missing a company round, recruiter call or assessment without informing anyone	Yes
Missing a mandatory mock drive or mock interview	Yes
Joining more than 10 minutes late without informing anyone	Yes
Withdrawing less than 24 hours before a round	Yes
Withdrawing with more than 24 hours' notice and a stated reason, subject to approval	No
Attending and not being selected	No — that is a normal outcome

Genuine reasons can be waived — medical or family emergency, university examination clash, or a documented technical failure during an online assessment. Inform the CoE Ops Mentor **within 24 hours**, with proof.

Simplest rule: if something will stop you attending, tell the CoE Ops Mentor before the round.

Zero tolerance. Any unfair means in a company test or assessment, and any misbehaviour or indiscipline with a recruiter, the CoE team or the placement team, results in **immediate disqualification** from the Centre of Excellence and every opportunity through it. No warning, no review.

If you are not selected

Most candidates do not convert most drives. That is true of every engineer you will ever work with. It is information, not a verdict on you.

1. **Within 5 working days**, the CoE Solutioning Lead runs a 20-minute one-to-one — what was asked, where it broke down, what you would do differently.
2. **The gap gets named** specifically: technical depth, project or applied gap, communication and articulation, interview structure, or assessment speed.
3. **You get a time-bound action** with the Solutioning Lead — a specific set of work, with a review date. Not “revise SQL”.
4. **You return to the pool** for the next matching drive once that work is signed off.
 - Come to the debrief with your own notes. “I could not explain why I chose a star schema” gets you a far better plan than “it went okay”.
 - Dropping off at the same stage across three drives triggers a review of your track plan with you — that is ours to fix, not yours alone.

Who to contact

Your first point of contact for anything here is your **CoE mentor** — placement queries, preparation, absence intimation and offer discussions.

For	Contact
Preparation, mocks, shortlisting, technical queries	Anand — CoE Solutioning Lead
Absence intimation, exception requests, general queries	Ashit — CoE Ops Mentor (within 24 hours for absences)
Drive scheduling and logistics	Your assigned Ops PM team member
Escalation	CoE Head

Acknowledgement. Every DE track student reads these guidelines and confirms acknowledgement before their first drive — confirming you understand the eligibility requirements, the participation rule, the upgrade rule, the zero-tolerance clause and how shortlisting works.

Right to amend. The Head of the Centre of Excellence may revise these guidelines — including eligibility criteria and CTC thresholds — in line with market conditions and how the placement season progresses. Any change will be communicated to you in writing.

Acknowledgement Details

First name: Divya

Last name: Kumawat

Phone number: +917415500492
